

Just for Families!

We are going to need our suitcases and backpacks for our next unit, "Let's Travel." From traveling around our community to traveling across the globe, we are going to be learning about the many different ways people get from place to place. Here are a few of the main concepts we will explore during this unit:

- * What Does It Mean to Travel?
- * Cars, Minivans and SUVs
- * Tools Used When Traveling
- * Traveling Near
- * Traveling by Bus & Rail
- * Airplanes Help Us Travel Far

Here are some activities you can do with your child at home that reinforce our unit, "Let's Travel."

Bathtime:

Add toy boats to the bathtub and sing the familiar song, "Row, Row, Row Your Boat" as your child plays.

Mealtime:

For a special treat, go out to eat at a restaurant. Talk about the type of transportation you take to get there.

Out & About (Traveling):

Look for different types of transportation while riding in the car. How many different kinds can your child find?

Bedtime:

Read books about different types of transportation. Challenge your child to point out the different types he/she sees in the pictures as you read.

Have your child find a toy car and then sing the song below as you push it back and forth together. If you have an assortment of vehicles, change the words to match each type as you play with it together.

LITTLE CAR
(tune: "The Wheels on the Bus")

The little car drives back and forth,
Back and forth, back and forth.
The little car drives back and forth,
Vroom! Vroom! Vroom!
